REQUIREMENTS FOR ADMISSION.

No person shall be admitted a member of the Freshman Class, unless he has completed his fourteenth year, nor to advanced standing, without proportional increase of age. He must bring satisfactory evidence of unexceptionable moral character, be thoroughly acquainted with the Grammar of the Latin and Greek Languages, and be able to construe and parse any portion of the following books, namely: Jacob's, Felton's or Colton's Greek Reader, Cæsar's Commentaries, Virgil, Cicero's Select Orations, and to translate English into Latin and Greek correctly. He must also be well acquainted with ancient and modern Geography, Arithmetic, English Grammar, and with Algebra, as far as Quadratic Equations. To enter upon an advanced standing, he must in addition, be thoroughly versed in all the preceding studies of the class to which he proposes to be admitted.

The Grammars used in College, are Kuchner's Greek, and Andrews and Stoddard's Latin Grammar. Candidates for admission will be subjected to a rigid examination in these, or in such other Grammars of the Latin and Greek Languages as they may have studied.

The regular examinations for entrance are held as follows: on the Saturday preceding Commencement, from nine A. M. till one P. M.; on the Monday preceding Commencement, from eight A. M till six P. M.; on the Tuesday preceding and the Thursday following Commencement, from eight A. M. till one P. M. It is particularly desired that candidates for admission present themselves within the above specified hours. Premiums are awarded for excellence in preparatory studies, in accordance with rules made known on a subsequent page.

It is required by the statutes of the University, that the above studies be pursued, and the regular examinations in them sustained, by every person who intends to become a candidate for the degree of Bachelor of Arts.

The Faculty are aware that these studies cannot be advantageously pursued except by persons who have attained some degree of intellectual maturity. Such, however, they think must be the case with any course of discipline, intended really to lay the broad foundations of a liberal education, or to prepare young men for the learned professions. It might also be suggested, that individuals whose youth may disable them from pursuing the above studies with success, would do wisely to delay the commencement of a collegiate education to a somewhat later period. The arrangements of such a seminary as this, pre-suppose in the pupil some power of self-government, and some decidedly formed feelings of social and moral responsibility. Until the character of a young man be thus far formed, he is too young to enter a public institution.

ENGLISH AND SCIENTIFIC COURSE.

There has been established in the University, in connection with the regular Collegiate Course, an English and Scientific Course, designed for the benefit of those who do not propose to enter either of the learned professions, but who desire to prepare themselves, by a thorough education, for some one of the more active employments of life. This Course embraces every department of English study pursued in the University, together with the several branches of Mathematical and Physical Science; and

moreover, opens to the student all the advantages of the Library, the Cabinet of Natural History, and the Courses of Lectures on Chemistry, Natural Philosophy, Physics, Intellectual Philosophy, and the Evidences of Christianity. It is believed that such a Course will furnish to those who are preparing for Mercantile pursuits, or for the higher employments of Agriculture and Manufactures, the means of securing, at a moderate expense, an education specially adapted to their wants. The Course is arranged for a residence of either one or two years, according to the wish of the student. The Studies for the Course of one year, are —

FIRST TERM.

Plane Geometry, Animal Physiology, Modern History, Intellectual Philosophy, French, Lectures on Mechanics.

SECOND TERM.

Solid Geometry, Rhetoric, Chemistry, Moral Philosophy, French, Lectures on Mechanics.

THIRD TERM.

Rhetoric, Political Economy, Constitution of the United States, Surveying, Navigation, Mensuration of Heights and Distances, French, Lectures on Vegetable Physiology and Agriculture.

The Studies for the Course of two years, are —

FIRST YEAR.

FIRST TERM.

Plane Geometry, Algebra, Animal Physiology, French.

SECOND TERM.

Solid Geometry, Trigonometry, Chemistry, Rhetoric, French.

THIRD TERM.

Surveying, Navigation, Mensuration of Heights and Distances, Rhetoric, History, French, Lectures on the applications of Chemistry, Vegetable Physiology.

SECOND YEAR.

FIRST TERM.

Mechanics, Astronomy, Intellectual Philosophy, Modern History, Logic.

SECOND TERM.

Mechanics, Moral Philosophy, Butler's Analogy, Rhetoric.

THIRD TERM.

Optics, Political Economy, Geology, Constitution of the United States, Lectures on Agriculture.

The above Courses, it will be seen, embrace a greater number of studies than can be advantageously pursued by the same individual, in the limited time allotted to them. The design is, to allow each student, aided by the advice of the Faculty, to select from the respective Courses such studies as shall be best fitted to prepare him for the particular pursuits in which he proposes to engage.

LIBRARIES.

The College Library is in Manning Hall, and at present contains upwards of 20,000 well selected volumes. It is constantly increasing from the proceeds of a permanent fund established for this purpose. In addition to the College Library, the Libraries of the Philermenian and the United Brothers' Societies comprise together upwards of 6,000 volumes, making in all upwards of 26,000 volumes, accessible to all the students of the University.

CABINET.

The Cabinet, together with the apparatus of Chemistry and Natural Philosophy, is in Rhode-Island Hall, which is furnished with spacious Lecture Rooms for the accommodation of the departments of Mechanical and Physical Science. A collection of Specimens, for the purpose of illustration in Geology and Natural History, was commenced some years since, and furnishes valuable aid to the instruction in these sciences.

ASSISTANCE TO INDIGENT STUDENTS.

The Trustees of the University are now making arrangements by which a portion of the charge for tuition for each Term will be remitted to those students whose character and scholarship are such as render them worthy of aid from others, and whose circumstances without such aid would preclude them from the benefits of a liberal education.

PREMIUMS.

In order to encourage deserving talent and to stimulate industry, the friends of the University at different times, have made provision for the establishment of premiums, to be annually distributed to those students who attain to the highest excellence in the several departments of their collegiate course. Nearly four hundred dollars were distributed in this manner during the past year.

The premiums which have been thus established are as follows :

I. THE JACKSON PREMIUMS.

FOUNDED BY THE REV. HENRY JACKSON.

By this foundation a premium of the value of twenty-five dollars is annually awarded to the author of the best dissertation in Intellectual Philosophy; the same to the author of the best dissertation in Moral Philosophy; and the same to the author of the best dissertation in Political Economy. The competition for these premiums is limited to the undergraduates of the Senior Class.

II. UNIVERSITY PREMIUMS.

By the statutes of this foundation, it is enacted that the following premiums shall be annually offered to the undergraduates of the several classes respectively.

I. IN THE FRESHMAN CLASS.

A first and a second premium for the best Latin composition.
A first and a second premium for the best Greek composition.
A first and a second premium for excellence in the Mathematics.

II. IN THE SOPHOMORE CLASS.

A first and a second premium for the best Latin composition.
A first and a second premium for the best Greek composition.
A first and a second premium for excellence in the Mathematics.
One premium for the best English composition on the subject appointed.

III. IN THE JUNIOR CLASS.

A first and a second premium for excellence in Mechanical Philosophy.
A first and a second premium for the best English composition on the subject appointed.
A first and a second premium for excellence in Physical Science.
One premium for the best composition in either the Latin or Greek language.

IV. IN THE SENIOR CLASS.

A premium for excellence in Astronomy.
A premium for the best dissertation on a subject in history.
A premium for the best dissertation on a subject in Physical Science.
A premium for the best composition in either the Latin or Greek language.

The value of the first premiums in the Freshman and Sophomore Classes and of the premiums in English Composition is fifteen dollars, and that of the second premiums ten dollars each. The value of the first premiums in the Junior Class and of the premium for Latin or Greek composition is seventeen dollars, and of the second premiums fifteen dollars each. The value of the premiums in the Senior class is twenty dollars each.

Whenever the premiums offered to a class shall not have been awarded, the residue will be conferred on such deserving students of the other classes as may be recommended for this distinction by the Examining Committee.

The dissertations entered for premiums must be presented to the President on or before the last Saturday of the third collegiate term except those of the Senior Class, which must be presented on the day following their final examination.

The award of the premiums in Astronomy, Mechanical Philosophy, and Mathematics, will be determined by public examination; the award of the others by dissertations.

III. THE PRESIDENT'S PREMIUMS.

The interest of one thousand dollars is annually appropriated in the President's Premiums. This class of premiums is awarded to those members of the Freshman class who have attained the highest excellence in the studies preparatory to admission. They are fixed by the statutes as follows.

A premium of the value of fifteen dollars for the highest, and of ten dollars for the next to the highest attainment in the Greek language. A premium of fifteen dollars for the highest, and of ten dollars for the next to the highest attainment in the Latin language.

The names of the prize scholars are designated in the annual catalogue for the year in which they are awarded, together with the name of the teacher under whose instruction they have been prepared for College.

The examination for the President's premiums is held on the Saturday of commencement week, at nine o'clock, A. M.

INFORMATION FOR PARENTS AND GUARDIANS.

I. REGULATIONS AND DISCIPLINE.

The *Regulations* of the institution are formed with the single design of promoting the intellectual and moral advancement of its members. They are made public, and may be known by every candidate before admission. If at any time, a student becomes dissatisfied, he is at liberty immediately to withdraw, with every testimonial of scholarship and character to which he is entitled.

The *Discipline* of the institution is intended to be strictly parental. The officers desire to cultivate with their pupils habits of kind and familiar intercourse, and to influence them rather by an appeal to the better principles of the heart, than by severe or disgraceful punishment. If, however, the conduct of a student render it evident that he is not susceptible of such influence, he is immediately, and if possible, without disgrace, returned to his friends, in the hope that under other circumstances, he may yet form a character which will give promise of usefulness. Immoral or disorderly conduct, or habitual negligence in his attendance upon collegiate duties, is always considered a sufficient reason for directing a student to leave the institution. If any student, after having completed the studies of any year, shall upon examination, be found incompetent to pursue the studies of the year succeeding, he is permitted, without additional expense of tuition, to enter the class immediately below him, and thus enjoy a second opportunity of qualifying himself to proceed in the course.

An accurate account of the delinquencies of every student, and also of the degree of his attainment in conduct, scholarship and attendance, is kept; a copy of which account, in connection with the regular term bill, is transmitted to every parent or guardian who may desire it.

The students generally occupy rooms in the College edifices, and board in Commons. Any student, however, at the request of his parents, is permitted either to board, or to board and lodge at any suitable private house in the city. It is desired that students residing in the city should lodge at home, that they may, as much as possible, be under the guardianship of their parents.

II. ANNUAL PAYMENTS.

The board in Commons is charged at its net expense, and varies with the price of provisions. The price varies from $1 70 to $1 85.
